## OUR MEDICAL CENTRE

### Our Mission

"Honest to our principle, we provide the highest possible standards of care and treatment in a professional and compassionate manner to every patient".

### Vision & Values

Based on our Mission Statement, our vision and values are:

To build an excellent patient focused service, based on superior and evidence based practice throughout the organization.

To provide this service to the patient the maximum level in a well-managed and appropriate environment.

To promote a culture that will:

Ensure high quality of care/service.

Ensure that decisions regarding delivery of care/service are patient focused and evidence based.

## CEO MESSAGE:

As CEO of Minsa Medical Centre, it is my pleasure to welcome you to the best medical facilities from basic and special care to long term care, we are committed to deliver compassionate medical care for every stage of life. Through MMC continuum of medical services families have access to high-quality, patient-centered care that is coordinated and conveniently located close to home.

## OUR MISSION

In our transformative journey over the past four years, Minsa medical Centre has achieved many milestones and set new benchmarks. The spirit of innovation and discovery has been our main motive.

When we started in 2016, all we had was a crystal clear vision and a committed team of just five members. When this is juxtaposed with all that we have achieved in three years we are humbled and inspired by our scale. But scale is just a mere statistic unless it can be tapped to drive great benefit and great transformation. At Minsa Medical Centre, this has been our clear goal; and now leveraging our immense reach and scale is hardwired into our core DNA, our mission.

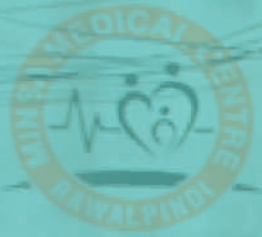

The aim is to establish an institution which is patient and physician friendly, providing excellent quality health care to all in a very professional and compassionate way under one roof at a very affordable price and to provide free medical services to deserving patients as far as possible, through the vast network of clinics.

Our mission for the future requires complete commitment and agile thinking. This initiative by the MMC to converge and consolidate its various skill sets and offerings into one consistent focal point is imperative to drive the momentum we seek. The MMC has always been a beacon for healthcare progress in the area. Clarity of thought and action of this kind will ensure that we will continue to lead by example.

I congratulate the entire Minsa Medical Centre team, and wish them every success in their future endeavor.
